DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, the contact surface should only be adapted to be connected to the electrode-connector since the latter element is not a positive element of the cap. Claim 3 is vague since the adhesive on the wing should be for connection to the electrode-connector. Claim 12 is vague since 1) the cap is not positively connected to the electrode-connector with the wire passing through the opening of the cap, 2) "the other" should be --the other shape-- in line 6, and 3) the cap of claim 1 should state that the contact surface should only be adapted to be connected to the electrode-connector, as noted supra, but the combination recited requires positive connection, rendering the reference to the prior recited cap improper.

Specification

The disclosure is objected to because of the following informalities: the first sentence in paragraph 10 is vague.

Appropriate correction is required.

Allowable Subject Matter

Claims 1-12 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Art Unit: 3739

Conclusion
